- **EASY INSTALLATION** in line or at 90° with respect to the guide.
- **LED COURTESY LIGHT** with low power consumption.
- **COMPATIBLE** with the chain and belt guide of the previous series.

THE VER PLUS TECHNOLOGY

In addition to the exclusive features offered by the standard version, VER PLUS, includes all CAME's new technologies related to safety and connectivity:

CAME KEY

The control board is equipped with a slot that allows the direct connection of CAME KEY, the Wi-Fi device for remote configuration.

CAME CONNECT

VER PLUS can be connected to CAME Cloud for the complete remote configuration and management of automations on smartphone or tablet.

RIO SYSTEM

Wireless and battery-powered security devices can connect to the automation through a dedicated electronic module.

SAFETY BATTERY SYSTEM

It can work also during blackouts thanks to an internal emergency power supply.

CAME KEY: YOUR NEW WORKING TOOL

The next generation working tool has arrived. No longer are you required to spend time on your knees, in the pouring rain, configuring the control board of the automation system.

CAME KEY is a local Wi-Fi interface that can communicate directly with your control board, allowing you to manage configuration using a smartphone or tablet with no need of an Internet connection

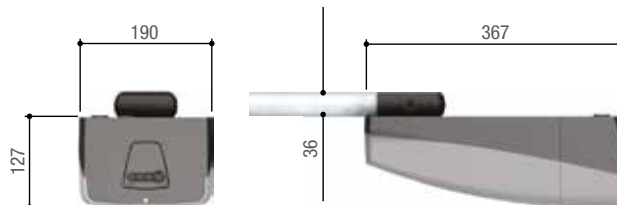

CAMECONNECT
CLOUD CONNECTED TECHNOLOGY

EXPERIENCE NOW THE FUTURE TECHNOLOGY FOR YOUR BUSINESS

CAME CONNECT is the cloud system that allows you to remotely manage the automation system via a mobile device or through a PC with an Internet connection.

Using a "Gateway" device that is locally installed onto the system, the automation will be connected to a CAME certified world wide network accessible through a dedicated user platform.
