PRESS RELEASE

CONTEMPORARY DESIGN AND MAXIMUM RELIABILITY
CAME PRESENTS THE NEW SPEED GATE PG 04

Fitted with a brushless direct drive motor that ensures smooth and silent movements, eliminating mechanical stress and guaranteeing a lifespan of over 10 million cycles.

Dosson di Casier (Treviso), 01.21.2026. **Contemporary design, advanced technology, and maximum reliability: PG 04** is the new speed gate from **CAME**, a leading company in the field of integrated automation solutions, designed to meet the needs of high-traffic environments, where smooth running and the quality of user experience are essential elements. A solution that combines aesthetics and functionality, designed to integrate naturally into modern and complex environments.

PG 04 stands out for its ultra-slim, elegant and stylish design, the result of a combination of painted steel and tempered glass, capable of adapting to any architectural context. It is the **ideal choice for access management** in spaces such as business centers, airports, stations, banks, companies, offices, gyms, and large public spaces, where high fluidity and continuous transit flows must be ensured.

The swing gates open completely in just **0.8 seconds**, freeing the passageway quickly and safely even under intensive use, guaranteeing 30 cycles per minute. Flexible and resistant, available in **550 mm and 900 mm** configurations, PG 04 allows the creation of gates that are also accessible to people with disabilities, contributing to the elimination of architectural barriers. Safety is ensured by **14 integrated smart sensors**, which constantly monitor the passageway, and by a **visual signaling system with RGB LEDs** positioned on the front and on the top of the gate. The lights, which can be configured in various operating modes, guide the user clearly and intuitively, improving user experience and flow control.

As regards installation and management, PG 04 is designed to simplify the work of professionals: the **electronic board with OLED display** makes installation and configuration quick and intuitive, while the sturdy, electrostatically powder-coated galvanized steel structure ensures durability and ease of maintenance. The system is fully compatible with any access control solution and is pre-configured for the integration of additional readers and sensors, thereby seamlessly integrating into the CAME technological ecosystem. People entering the CAME world can also benefit from the support of a team of professionals working with partners and designers to assist the customer throughout the process, from design and construction to after-sales and maintenance. Specialized engineers and technicians work in synergy, bringing together all the company's know-how to create highly integrated and customized systems, tailored to the needs of each context, confirming the company's philosophy: tailor-made solutions for increasingly smart people, buildings, and cities.

CAME's experience in the access control and flow management sector is consolidated by numerous installations in high-traffic contexts. Among these, the **Polis project for Poste Italiane**, implemented with CAME speed gate solutions, is a significant reference: a large-scale intervention that saw the installation of pedestrian gates integrated with advanced access control systems in over 80 locations throughout the country. With PG 04, CAME has added to its offer in the motorized turnstile and gate segment, confirming a **wide and varied range** designed to meet the design and performance requirements of large contemporary spaces.

CAME

PRESS RELEASE

CAME

CAME is a leading global brand for high-quality technological solutions and products for automation, smart home, access control and security and parking systems that can improve the lives of the people who use them and the work of professionals.
With more than 50 years of history behind it, and even longer experience thanks to the companies that now belong to it, the Group founded by Paolo Menuzzo, now President of the holding company, is headquartered in Dosson di Casier, in the province of Treviso, and owns 10 manufacturing sites in Italy, France, Spain, UK, Turkey, and Brazil. Andrea Menuzzo, son of the founder, is the Chairman and CEO of CAME S.p.A. The company has over 2500 employees, serves the market with more than 25 branches and 40 warehouses around the world, and operates in over 110 countries worldwide through partners and distributors with an integrated and global vision. In 2024 it generated a turnover of 341 million euros.

Follow CAME on its website www.came.com and through its LinkedIn, Facebook Instagramand WhatsApp accounts.
