PRESS RELEASE

ACCESS CONTROL TECHNOLOGY AT THE ARENA DEL BOSCO DELLO SPORT

Dosson di Casier (Treviso) 28.10.2026. Full-height turnstiles to regulate spectator entry and automatic barriers to manage access for authorised vehicles. **CAME S.p.A**., a global leader in automation, smart homes, access control and security, and parking systems, is also contributing to the construction of the **Arena del Bosco dello Sport in Venice**. The new multi-purpose venue is designed to accommodate up to **10,000 spectators** for sport, concerts and other major events. The Arena is one of the most important elements of the Bosco dello Sport project, the new sport and events hub in the Venice area. Located near Marco Polo International Airport, the facility will extend over four levels, with areas for the public, teams, performers and event-related services.

In this context, **CAME is providing its access management and security technology** – a fundamental factor when designing large sports facilities, as it affects both the organisation of pedestrian flows and the quality of the public's experience. The project entails supplying and installing **18 full-height turnstiles, configured in four sectors**, regulating public access to the various areas of the Arena. Featuring a stainless-steel rotor and set up for integration with ticket readers, the devices enable the control of transit and help keep pedestrian flows orderly. The contract also involves supplying **two automatic barriers** for vehicle entrances reserved for sports club coaches and authorised staff vehicles. Access management in a venue designed to host a variety of events **requires reliable, flexible and integrated solutions** capable of meeting diverse security and organisational requirements. In this regard, the Arena del Bosco dello Sport highlights the expertise CAME has come to acquire over years of international experience in large sports facilities.

The Venice project adds to the group's acknowledged expertise in managing and securing access to large sports facilities and high-capacity venues. Its key international projects include the **Stade de France in Paris** and numerous facilities in the **Netherlands, Poland, Romania and Qatar**, where the company has implemented integrated solutions for pedestrian and vehicular access control. This expertise has also been built up in **Italy**, at sports facilities of all sizes, confirming CAME's ability to meet the specific **security and flow-management needs** of major events.

The Municipality of Venice has awarded the contract to a consortium led by CEV S.p.A., with Gianni Benvenuto S.p.A., Milani S.p.A. and MAEG Costruzioni S.p.A.

CAME

CAME is a leading global brand for high-quality technological solutions and products for automation, smart home, access control and security and parking systems that can improve the lives of the people who use them and the work of professionals.
With more than 50 years of history behind it, and even longer experience thanks to the companies that now belong to it, the Group founded by Paolo Menuzzo, now President of the holding company, is headquartered in Dosson di Casier, in the province of Treviso, and owns 10 manufacturing sites in Italy, France, Spain, UK, Turkey, and Brazil. Andrea Menuzzo, son of the founder, is the Chairman and CEO of CAME S.p.A. The company has over 2500 employees, serves the market with more than 25 branches and 40 warehouses around the world, and operates in over 110 countries worldwide through partners and distributors with an integrated and global vision. In 2024 it generated a turnover of 341 million euros.
Follow CAME on its website www.came.com and through its LinkedIn, Facebook and Instagram accounts.
